Objective

Motivated B.Tech Information Technology student seeking a co-op opportunity to apply hands-on development skills in cloud computing, front-end engineering, and AI/ML. Interested in contributing to real-world projects while deepening expertise in modern software engineering practices through practical, industry-driven experience.

Education

Bachelor of Technology — Information Technology

Sep 2025 – Aug 2029

Dr. A.P.J. Abdul Kalam Technical University (AKTU) | PSIT Kanpur

Intermediate School Diploma (Class XII)

2023 – 2025

GD Goenka School, Varanasi

Junior & High School Diploma (Class X)

2012 – 2023

St. John's School B.L.W., Varanasi

Technical Skills

Languages: Java (**HackerRank Certified**), C (**HackerRank Certified**), Python, HTML, CSS, JavaScript

Frameworks & Libraries: Firebase, React (learning), Node.js (learning)

Cloud & DevOps: Google Cloud Platform, NVIDIA NIM, Generative AI on GKE

Tools & Platforms: Git, GitHub, VS Code, Jetson Nano, Android Studio

Core Concepts: Front-End Development, REST APIs, Open-Source Contribution

Soft Skills: Problem Solving, Continuous Learning, Collaboration, Communication

Experience

Contributor / Mentee — GirlScript Summer of Code (GSSoC 2026)

May 2026 – Present

Open-Source Program · Remote

- Contributing to open-source repositories under mentorship, reviewing pull requests and submitting feature additions in a collaborative GitHub-based workflow.
- Developing practical skills in version control, code review, and community-driven software development.

Google Cloud & NVIDIA Community Member — Google for Developers

Jan 2026 – Present

Google Developer Group Member | Google Cloud Innovator

- Active member of Google Developer Groups (GDG), participating in workshops, study jams, and developer events focused on cloud and AI technologies.
- Recognised as a **Google Cloud Innovator** — a program that provides enhanced access to Google experts and resources to accelerate cloud skill development.
- Engaging with the broader cloud community to share knowledge and stay current with Google Cloud Platform advancements.

NVIDIA Developer — NVIDIA Developer Program

Feb 2026 – Present

Remote

- Completed certified training on deploying **Generative AI models with NVIDIA NIM on GKE** and edge AI on **Jetson Nano**.
- Exploring NVIDIA's AI and GPU computing ecosystem to build optimised, production-ready AI pipelines.

Projects

Safe Yatra — AI-Powered Tourist Safety & Monitoring System

April 2026 – May 2026

PSIT Kanpur (Pranveer Singh Institute of Technology) | Full-Stack / AI

- Built an **AI-driven real-time tourist safety platform** using Firebase, Firestore, and Leaflet.js, enabling live GPS tracking, geo-fence breach alerts, and 1-click SOS for travellers across India.
- Integrated **Google News RSS feeds** with AI-powered keyword extraction to continuously analyse region-specific threats — crime, weather hazards, civil unrest, and overcrowding.
- Developed an **admin dashboard** with real-time map rendering, geo-fence creation tools, and an SOS queue management system for rapid emergency intervention.
- Architected for future expansion to **drones, wearable SOS devices, and smart tourism infrastructure**, targeting missing-person incidents, pilgrim events, and large-scale disaster response.
- *Skills:* Firebase, Firestore, JavaScript, Leaflet.js, Geo-fencing, AI Integration, Emergency Systems, Project Management

Project Iron Sky — Arduino Radar Missile Launcher System

Nov 2025

PSIT Kanpur (Pranveer Singh Institute of Technology) | Embedded Systems / Robotics

- Designed and built an **automated smart-defence prototype** using an Arduino microcontroller as the central command unit, integrating sensor intelligence, precision aiming, and automated response.
- Engineered the physical platform with a **dual-servo system**: a targeting servo for horizontal launcher rotation and a scanning servo to sweep an ultrasonic sensor acting as short-range radar.
- Programmed a continuous **detection-and-engagement loop** in C/C++ — scanning the environment, analysing distance readings, aligning the launcher servo, and triggering the firing mechanism autonomously.
- Demonstrates a real-time fusion of **robotics, embedded programming, and sensor systems**; accompanied by a patent paper, prototype model, and presentation.
- *Skills:* Arduino (C/C++), Ultrasonic Sensors, Servo Control, Embedded Systems, Robotics

DuniyaDekho.com — Local Hotel Booking Website

2023 – 2025

St. John's School B.L.W., Varanasi | Web Development (School Exhibition)

- Created a **hotel booking web interface** aimed at simplifying reservations for tourists, presented at a school exhibition to demonstrate real-world problem solving through technology.
- Built entirely in **HTML** as a functional prototype; documented planned enhancements including CSS styling, JavaScript interactivity, and server-side dynamic content management.
- *Skills:* HTML, Project Management, UI/UX Planning

Electromagnetic Train — Metro System Concept Model

2023 – 2025

St. John's School B.L.W., Varanasi | Engineering / Physics

- Designed and assembled a **working electromagnetic train prototype** using neodymium magnets and hand-wound copper coils to simulate urban metro propulsion principles.
- Demonstrated precise control over speed and direction via AAA battery-powered electromagnets, with miniature station platforms modelling real metro infrastructure.
- Served as an **educational exhibit** illustrating the transformative potential of electromagnetism in transportation engineering.
- *Skills:* Engineering Design, Electromagnetics, Technical Prototyping, Physics Application

Certifications

- | | |
|---|-----------------|
| • HackerRank — Java | Certified |
| • HackerRank — C | Certified |
| • Walmart USA — Advanced Software Engineering Job Simulation | Forge |
| • Google Cloud — Introduction to Generative AI | Google |
| • Introduction to Claude Cowork | Anthropic |
| • Getting Started with AI on Jetson Nano | NVIDIA |
| • Deploy Faster Generative AI Models with NVIDIA NIM on GKE | NVIDIA / Google |

Honours & Awards

- **National Cyber Olympiad (SOF)** — School Rank #1, **Gold Medalist**
- **ICAS Digital Technologies** — Top 23% of participants in the Indian Subcontinent Region
- **People's Choice Award** — Chitrahaar, District-Level Photography Competition
- **Gold Medalist** — Inter-House Basketball Tournament
- **Gold Medalist** — Inter-College Cricket Tournament
- **Protech Hackathon for 1st Year** — Winner with outstanding grade (Safe Yatra)

Key Co-op Competencies

- | | |
|---------------------------------------|--|
| • Cloud-native development (GCP) | • Open-source collaboration (Git/GitHub) |
| • Generative AI & LLM integration | • NVIDIA edge AI & GPU computing |
| • Firebase & real-time databases | • Agile & remote team workflows |
| • Front-end engineering (HTML/CSS/JS) | • Self-directed learner & fast adapter |
